

Exam Worksheet – Sustainability

1. Summarizing (Content)

In your own words, explain the three main dimensions of sustainability discussed in the text. (Environmental, social, and economic).

2. Critical Thinking (Evaluation)

The text claims that “growth can no longer be measured solely in terms of GDP.” Do you agree with this statement? Justify your answer with arguments and, if possible, examples.

3. Application (Transfer)

Suggest two practical actions that individuals can take in their daily lives to contribute to sustainability. Explain how these actions address at least one of the three dimensions.

4. Discussion (Advanced)

“Sustainability requires cooperation across borders, disciplines, and generations.” To what extent is international cooperation realistic, given current global conflicts and competition? Discuss.
